

BOTTLED GASES POLICIES & PROCEDURES

- Due to current supply chain challenges, gases must be ordered for FABTECH by Friday, May 31.
- nexAir, FABTECH's Official Bottled Gas Provider, will take orders for gases. Orders can be placed in the Exhibitor Services Manual. nexAir will confirm your order with a receipt.
- Freeman will take orders for the handling of the large containers and pallets. Orders can be placed in the Exhibitor Services Manual. Gases that require a forklift will be noted on order forms.
- Exhibitors do not have to take possession of all cylinders at once, but nexAir is only able to deliver to the booth when there are no attendees on the show floor.
- Booth personnel will need to be at the booth to take possession of the cylinders. All cylinders must be secured to a stable structure within the booth to prevent them from falling over.
- If wanting multiple deliveries, please enter different orders with the specific ship dates. Gases will be delivered according to the day and times exhibitors have requested when ordering. Gases will only be delivered when there are no attendees on the show floor.
- nexAir personnel cannot hook up the cylinders to exhibitor's equipment and machinery. Cylinder hook ups are the responsibility of the Exhibitor. nexAir will deliver the cylinders to the booth only. Regulators do not come with the cylinders. Regulators can be purchased through nexAir.
- Exhibitors will need to leak test the connections once they have been hooked up regulators and other equipment
- NexAir will provide a QR code at the Exhibitor Service Desk for additional requests.
- Unless nexAir cannot provide the gases you require, you must order gases from the official gas provider, nexAir. Since Show Management is providing a blanket gas permit, Orange County Fire Rescue Department must be aware of all gases coming into the event. Please contact Show Management if you have any questions at cmoody@sme.org.
- If you have any questions regarding gases, please reach out to nexAir Operations at fabtechorders@nexair.com.
